If the LED indicator flashes, and you will find the "B01" under the "Paired Devices" list, please press Home button for 5 seconds to turn off the gamepad and then press Home button for 2 seconds to turn on the gamepad that will automatically connect to the phone. R: If the LED indicator flashes, and you can't find the "B01" under the list "Available Devices", which means that the gamepad did not enter the "Play Mode". A big difference between the two is that the Switch Lite has a battery life longer than 12-15 hours. When I hold down the power button the gamepad does not turn on If the battery has a low charge this can cause it is unable to turn on. My Gamepad will turn on but it won't connect to my Switch. Make sure when the charger is connected as the charging light on the top of the controller is illuminated. It is slightly larger than the standard controller for better grip. 1.2.2 Remove Press the next area from closing to loosen the clip. 2.5 Q & A Q: Why the LED indicator flashes, but the gamepad is unable to connect to my phone/table? If joysticks do not respond as expected, check whether any dirt, lint or dust can be accumulated around the joystick base. "B01" will be marked as "Connect". This process can be found here.
