Command line tools only

If you do not need Android Studio, you can download the basic Android command line tools below. You can use the included [SDK manager](#) to download other SDK packages. These tools are included in Android Studio:

Platform	SDK tools package	Size	SHA-256 checksum
Windows	sdktools-windows-4337796.zip	148 MB	7d1496320e474f8e18e635285b5d48954e5f5e6d765a2966057a
Mac	sdktools-macos-4337796.zip	98 MB	e529298b073d1262f9f90126b080838434a4a6f768760232110825a
Linux	sdktools-linux-4337796.zip	142 MB	9278e51e08865634687132d40506453103f01096303d05010649

See the SDK tools release notes.

Android studio bookmark line.

You can start writing an element name for IntelliJ, Idea to restrict research. You can start watching a video tutorial to check which navigation options are available in IntelliJ, Idea. To navigate forward, press CTRL + ALT + RIGHT. To navigate to the last edited location, press CTRL + SHIFT + Backspace. To find the current location of the carpet in the editor, press CTRL + M. In the dialog settings / preferences (Ctrl + Alt + S), go to. IntelliJ, Idea opens a popup where you can navigate the implementations, navigate to the source code, edit code and open the list in the location tool window. Simply start typing a search query, and the Search field for appears. You can also select the Option Open files with a click. Place the carpet in the desired symbol and press CTRL + B. You can navigate the source code with breadcrumbs that show class names, variables, functions, all and tags in the currently open file. Alternatively, in the main menu, select. IntelliJ, Idea puts the caret just before the problem of the code. Configure the way IntelliJ, Idea navigates between code problems. You can skip between all code problems or jumping smaller problems and navigate only between detected errors. In the editor, press CTRL + ALT + F12 or in the context menu, select. No popup reveal in the Finder, select a file or a directory to open in a path search engine and press ENTER. How to add or remove Favorites from Android Studio Go to browse> Favorites> Switch Favorites or press F11 (Windows) or F3 (Mac OS). To open the recent files popup with the list of recent files, press CTRL + E. To see only the recently edited files, press Ctrl + and again, or select the Selection box only changed files. Note: The last known version of Android Studio in which this I hope you will help him! To change the location of breadcrumbs, right-click on a breadcrumb, in the context menu, select Breadcrumbs and choose No Location. To edit the μ settings, in the settings μ / prefer Dialogs (Ctrl + Alt + S), I open the option Show Breadcrumbs to hide in the editor. In the popup, find an item you don't need. While in the popup, you can't sort file members, view the classes and inherited members. Click on one of the m ©all listed to quickly navigate to the whole m ©in the editor. In this menu you can also view a list of your current bookmarks. In the Recent Changes μ, select a file you don't need and press Enter to open it in a separate day where you can't check what has changed and reverse those changes μ if necessary. To move the carpet to the next or previous word, press Ctrl+Right or Ctrl+Left. By default, IntelliJ IDEA moves the carpet to the end of the current word. After that, IntelliJ IDEA will track the file that is currently open in the active editor tab and automatically locate it in the Project tool window. Press Ctrl+Alt+Shift+Down/Ctrl+Alt+Shift+Up.From the main menu, choose .Click a change marker, and then click or . To navigate to another, press Ctrl+Alt+Left. The mode is available in the editor by default when you do not hover over the scroll bar. See Configure keyboard shortcuts for details. You can also check your recently viewed or changed μ using the Find Recent μ popup. To open the Find Recent μ popup, press Ctrl+Shift+E. You can't see the implementations μs of m all in the neighboring classes in a separate popup. In the editor, put the grimace in the name of the whole subject. You can't set up carpet position when you use these μ. You cannot automatically find a class in the Project tool window. In the popup, select Project View and press Enter. In the Go to Row/Column dialog, specify a row or column number, or both, by separating them with : and click OK. To jump to the μ or previous problem found in your .etnemavitcepser .etnemavitcepser .2F + tlfihS uo 2F enoisserP
